Office Action Summary	Application No. 10/532,353	Applicant(s) NYSTROM ET AL.	
	Examiner Ghassem Alie	Art Unit 3724	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

- I. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- II. Claims 5-6, drawn to a handle for a handheld engine including a lever or a button secured to the handle section via a supporting section that has a pocket, classified in class 30, subclass 166.3.
- III. Claims 7-8, and 11, drawn to a handle for a handheld engine including a lever or a button secured in the handle section via a pin snapped into a circular section of a keyhole-shaped opening in the a lever or a button, classified in class 30, subclass 382.
- III. Claims 9-10 and 12, drawn to a handle for a handheld engine including a lever or button secured in the handle section by a separate metallic or plastic pin pressed into a prepared opening in the handle section, classified in class 30, subclass 383.

It should be note that remaining claims would be examined with the claims in one of the Groups above.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, invention I has a separate utility such as it could be used without a pin snapped into a circular section of a keyhole-shaped opening set forth in invention II, and a separate metallic or plastic pin pressed into a prepared opening in the handle section set forth in invention III. Conversely, invention II-III have a separate utility such as it could be used without the supporting section extending from the handle section and having a pocket set forth in invention I.

See MPEP § 806.05(d).

3. It should be noted that claim 1 links the inventions I-III. The restriction requirement of the linked inventions is subject to the nonallowance of the linking claim 1. Upon the allowance of the linking claim 1, the restriction requirement as to the linked inventions shall be withdrawn and any claims depending from or otherwise including all the limitations of the allowable linking claim will be entitled to examination in the instant application. Applicants are advised that if any such claims depending from or including all the limitations of the allowance linking claim is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subjected to provisional statutory and/or nonstatutory double patenting rejection over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. In re Ziegler, 44 F. 2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP 804.01.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their divergent subject matter, restriction for examination purpose as indicated is proper.
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor or at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a

Art Unit: 3724

request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ghassem Alie whose telephone number is (571) 272-4501. The examiner can normally be reached on Mon-Fri 8:30 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Boyer Ashley can be reached on (571) 272-4502. The fax phone number for the organization where this application or proceeding is assigned is (501) 273-8300.
